Summary

Data Engineer with 5+ years of experience in SQL, Python, and large-scale data systems. Built and maintained pipelines processing ~50M records daily. Recently focused on building full-stack applications, generative systems, and rapid prototyping using AI-assisted development workflows. Strong in debugging, system design, and shipping production-ready solutions.

Skills

Core: SQL (advanced), Python (working), JavaScript

Data & Backend: ETL pipelines, PostgreSQL, Redis

Tools & Workflow: Git, Linux, Cursor (AI-assisted development), API integration

Familiar: Snowflake, basic Spark

Experience

Independent Data & Platform Engineering (Jun 2025 – Present)

- Built full-stack applications and generative systems using AI-assisted workflows (Cursor, Copilot)
- Developed API-driven data pipelines using Python for ingestion and transformation
- Designed Redis-based caching and indexing layers for performance optimization
- Implemented cron-based workflows for automated background processing
- Rapidly prototyped and deployed multiple web and creative applications

Digit Insurance — Data Engineer (Nov 2023 – Jun 2025)

- Built automation tools reducing issue resolution time from ~30 minutes to under 1 minute
- Designed and maintained ETL pipelines processing ~50M records daily
- Implemented SQL workflows for policy renewals and customer notification systems
- Resolved 4000+ production issues and reduced backlog from 600 to under 70
- Built internal tooling using Flask and Pandas to improve operational efficiency

Appzwork Software Services Pvt Ltd — Software Engineer (Jan 2020 – Nov 2023)

- Developed SQL-based solutions for banking and insurance clients
- Built complex queries, joins, and stored procedures for analytics systems

- Handled production debugging, deployments, and incident resolution
- Supported database maintenance, patching, and recovery operations

Projects

Valipokkann Platform

- Built full-stack artist platform with React SPA and serverless backend
- Designed dual CMS architecture and media processing pipelines
- Implemented dynamic UI systems for content and artwork display

Onchain Rugs

- Developed generative NFT system with Redis-based indexing and caching
- Built scalable metadata and activity tracking architecture

Free Notes (iPad App)

- Designed note-taking system with geometric recognition
- Built layered architecture for structured document interaction

Education

B.E. – RMK Engineering College
